

# Sandvik Q4

PRESS RELEASE 3 February 2010

Full-year report 2009

## CEO's comments:

“During the fourth quarter, the market showed positive tendencies and the gradual recovery that began in the third quarter continued. This improvement is derived from very low levels and is largely a result of an easing of customer destocking. Order intake from the energy sector, and large parts of the Asian market, remained strong. The market situation improved slightly in North and South America, Australia and Africa, but remained weak in Europe,” says Sandvik’s President and CEO Lars Pettersson.

“Low invoicing combined with continued destocking due to planned low production rates had a negative impact on the operating result. Furthermore, earnings were charged with approximately SEK 600 M for restructuring and impairment and amounted to SEK 408 M. Implemented action programs generated favorable results in reduced costs and working capital, and a strong cash flow.

“Full-year 2009 placed considerable demands on Sandvik

to rapidly adjust to a significantly deteriorated market climate. Demand declined by approximately 30% and the rate of production was reduced by about 40%. During the year, extensive measures were conducted with the aim of reducing costs and tied-up capital, and ensuring a favorable cash flow. The costs were reduced during the year by approximately SEK 6 billion and savings amounted on an annualized basis to SEK 8 billion in the fourth quarter. Working capital was lowered by more than 30% and the operating cash flow was slightly more than SEK 12 billion. Meanwhile, the Group strengthened its market position and market shares increased.

“With the extensive adaptations implemented in 2009 to the organization, capacity and costs, we are well positioned to improve earnings through higher sales volumes and production rates.

“The Board of Directors proposes a dividend of 1 SEK per share (3.15) for 2009.”

## FINANCIAL HIGHLIGHTS

SEK M	Q4 2009	Q4 2008	Change %	Q1-4 2009	Q1-4 2008	Change %

# Market and sales

Q4	Order intake	Invoiced sales
Price/volume, %	-6	-26
Structure, %	2	1
Currency, %	0	1
<b>Total, %</b>	<b>-4</b>	<b>-25</b>

The table is multiplicative, i.e. the different components must be multiplied to determine the total effect.

The weak economic climate continued during the fourth quarter of 2009. However, there were signs of a gradual recovery in, for example, the automotive and mining industries. The activity in the energy sector was very high and the Group received several major orders. The market situation in Europe was weak, but improved somewhat in North America, Asia, Australia and Africa. The price trend remained stable.

The market development remains very difficult to predict. The trend in the fourth quarter was about the same as in the third quarter. In areas associated with the global industry, a slow but stable and sequential improvement was clearly discernable. A number of major orders were received, both by Sandvik Mining and Construction for mining equipment and materials-handling systems, and by Sandvik Materials Technology relating to tube products for the nuclear power and oil industries.

The weak demand was most notable in Europe, while activity in North America improved slightly. The trend in Asia, and China in particular, was positive for all business areas, while the improvement in Australia and Africa was largely linked to an increased activity in the mining industry. There was high demand for energy-related products during the quarter, mainly driven by a long-term expansion in the nuclear power industry, but also by high demand for products for the oil/gas industry. In the past two quarters, order intake from the aerospace and automotive industries primarily for cutting tools has shown a slow but stable increase. Activity in the construction industry, general engineering

industry and consumer-related industry remained low. Order intake for mining equipment increased compared with the preceding quarter, but was still at a low level. The aftermarket, which has been considerably more stable during the downturn, further improved.

During the fourth quarter, production rates increased slightly for all business areas, although they remained significantly lower than sales for the purpose of adapting inventories to the lower demand level.

Order intake totaled SEK 19,787 M (20,716), down 4% in total and 6% at fixed exchange rates for comparable units. The decline at fixed exchange rates for comparable units was 18% for Sandvik Tooling, but Sandvik Mining and Construction posted an increase of 6%. Order intake for Sandvik Materials Technology declined by 10%, including a negative effect of about 3 percentage points related to lower metal prices. Cancellations in the mining sector were marginal during the quarter, compared with SEK 700 M in the corresponding quarter in 2008.

Invoiced sales in the fourth quarter amounted to SEK 18,211 M (24,171), 25% lower in total and 26% at fixed exchange rates for comparable units than the very high invoicing levels reported in the preceding year. Changed exchange rates had a positive impact on invoiced sales of 1%. For Sandvik Tooling, the decline at fixed exchange rates for comparable units was 24% and the decline for Sandvik Mining and Construction was 30%. The reduction for Sandvik Materials Technology was 22%, including a negative effect of about 4 percentage points related to lower metal prices.

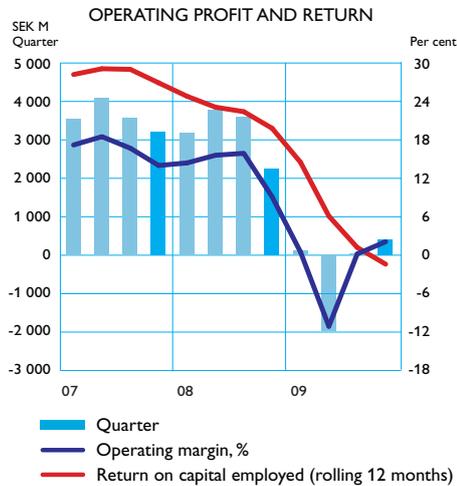

# Earnings and return

The result improved somewhat compared with the preceding quarter primarily as a result of higher sales volumes and reduced costs. As planned, production rates were lower than invoicing, which adversely impacted earnings but contributed to a very strong cash flow and a continued reduction of working capital. Metal price effects and cost savings had a positive impact on earnings. The operating result in the fourth quarter amounted to SEK 408 M (2,235). The operating margin was 2.2% (9.2) of invoicing.

The low invoicing and production levels compared with the preceding year resulted in a volume-related reduction in earnings of slightly less than SEK 3 billion compared with 2008. Earnings were negatively impacted by SEK 600 M resulting from non-recurring costs attributable to such activities as restructuring programs in all business areas, including a positive effect of SEK 75 M by changed metal prices. Changed exchange rates negatively impacted earnings by approximately SEK 125 M compared with the corresponding quarter in 2008.

Increased demand meant that production rates rose slightly in certain areas, but were lower than sales, as planned, to further reduce inventory levels. Cost-saving activities were intensified in all business areas and costs were reduced by about SEK 2 billion compared with the preceding year. Since year-end 2008, the cost savings achieved amount to just over SEK 6 billion. The workforce was reduced by a further 600 employees and the accumulated reduction in the number of employees since September 2008 is nearly 9,000, including contracted staff.

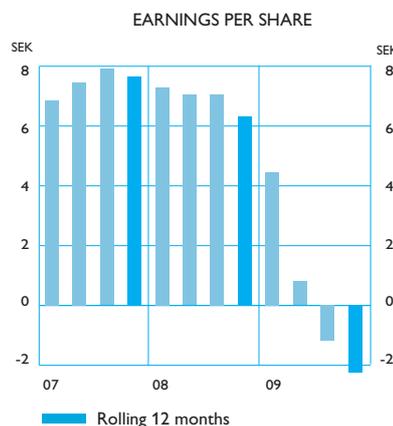

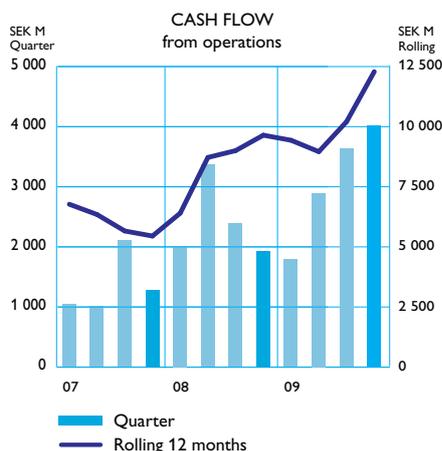

Net financial items amounted to SEK -485 M

(-711) and the result after financial items was SEK -77 M (1,524). Profit for the period amounted to SEK -103 M (1,154) and earnings per share amounted to SEK -0.11 (0.92).

Operating cash flow was SEK 4,008 M (1,925) and cash flow after investments and acquisitions amounted to SEK 3,000 M. The very strong cash flow is primarily a result of a reduction of about SEK 2,400 M in volume of net working capital, of which inventory was reduced by SEK 2,100 M, and a significantly lower investment level.

Investments amounted to SEK 1,168 M (2,089), of which company acquisitions accounted for SEK 493 M (19) and investments in rental equipment for SEK 95 M. The favorable development of cash flow and working capital resulted in a reduction in net debt from SEK 33 billion to SEK 30 billion. The net debt/equity ratio was 1.0. The return on capital employed amounted to -1.3% (19.9) and the return on shareholders' equity was -7.9% (24.8).

# Sandvik Tooling

- Strong cash flow
- Extensive cost reductions
- Positive price trend
- Low production rates

During the fourth quarter, both order intake and invoicing were significantly lower than the preceding year, which reflected a continued weak market. Compared with the preceding quarter, however, demand and sales increased somewhat, in part due to seasonal effects and in part as a result of a slight increase in demand. Production rates increased slightly compared with the preceding quarter, although they remained below invoiced sales. Consequently, inventory was further reduced, ensuring a strong cash flow.

Order intake declined 18%, while invoiced sales contracted 24% at fixed exchange rates for comparable units. The price trend was positive during the quarter.

Demand was relatively high in Asia, particularly in China, and improved slightly in North America compared with the preceding quarter.

A slow improvement was noted mainly in the energy and automotive industries. The increase in activity since September is an indication that many customers are ending destocking activities. Order intake from the aerospace, energy and medical technology industries was stable at a slightly higher level than the other segments. During the quarter, the rate of production rose somewhat, but was generally lower than the invoicing rate, for a continued reduction in capital tied-up in inventory. Inventory

Q4	Order intake	Invoiced sales
Price/volume, %	-18	-24
Structure, %	+6	+3
Currency, %	-2	-2
Total, %	-14	-22

The table is multiplicative, i.e. the different components must be multiplied to determine the total effect.

was reduced by SEK 700 M in volume and other working capital by nearly a further SEK 200 M, contributing to a strong cash flow.

Activities aimed at reducing costs and enhancing efficiency at Sandvik Tooling continued during the quarter and the workforce was reduced by just over 200 employees. Actions implemented during the quarter are estimated to have reduced costs by about SEK 900 M. Since the end of the fourth quarter of 2008, Sandvik Tooling has reduced its workforce by about 2,000.

Furthermore, personnel costs have been reduced by the equivalent of 2,200 full-time employees through the utilization of, for example, agreements regulating reduced working hours.

The operating result for the fourth quarter totaled

SEK -84 M (817) or -1.7% (12.9) of invoicing.

Restructuring measures and impairment losses impacted fourth-quarter earnings by approximately SEK 300 M.

Low sales and production volumes entailed a reduction in gross profit and considerable under-absorption of fixed costs, which are estimated to have negatively impacted earnings by about SEK 1.3 billion during the quarter. Earnings were negatively impacted by slightly more than SEK 100 M due to changed exchange rates. Return on capital employed declined to -2.2% (27,0).

# Sandvik

## Mining and Construction

- Strong cash flow
- Extensive cost reductions
- Positive price trend
- Under-absorption of fixed costs

The low levels of activity in the mining and construction industries affected Sandvik Mining and Construction's invoicing during the quarter. Demand from the construction industry remained weak. In the mining industry, signs of an initial increase in activity were more visible in the fourth quarter than in earlier periods. The aftermarket business improved gradually and, in the latter part of the quarter, order intake for new equipment and complete systems improved gradually, but from a very low level.

Order intake rose by 6% at fixed exchange rates for comparable units, while invoicing declined by 30%. The price trend remained relatively stable.

During the quarter, the business area received major project orders valued at approximately SEK 1,300 M from customers in Europe, South America and China.

Customer activity in the global construction industry remained weak during the quarter. Government stimulus packages have not yet had any material effect on order intake. A positive demand trend was reported for tools, spare parts and service to the mining industry as a result of increased production rates in the mining industry. Order intake for equipment mainly used in underground mining also showed signs of a recovery in the

latter part of the quarter, mainly in Asia, Africa and Australia. Activity in gold and coal mining increased during the quarter. Cancellations of orders had a marginal impact on order intake.

During the fourth quarter, equipment accounted for 33% of invoicing and aftermarket for 52%, while the project share was 15%.

Ongoing activities aimed at consolidating production units and adapting production capacity continued during the quarter. The workforce was reduced by just over 200 employees. Implemented

structural programs impacted earnings in the amount of approximately SEK 250 M during the quarter. Cost-cutting actions during the quarter are estimated to have reduced costs

by a total of about SEK 600 M. During the quarter, inventory was reduced by about SEK 1,000 M in volume, at the same time as investments decreased, resulting in a very strong cash flow.

The fourth-quarter operating result amounted to SEK 411 M (1,105) or 5.1% (10.0) of invoicing. Earnings were negatively impacted by about SEK 1,000 M due to lower sales and production volumes, but were positively impacted by about SEK 125 M due to changed exchange rates. Return on capital employed declined to 2.1% (24.2).

# Sandvik

## Materials Technology

- Favorable cash flow
- Stable price trend
- Energy sector remained strong
- Cost savings

The market situation for Sandvik Materials Technology remained weak during the fourth quarter. However, demand was high for products to the energy sector, where the nuclear power and oil/gas industries reported continued high activity levels. During the quarter, a gradual improvement in demand was noted from the mining and automotive industries, while activity in other segments was low.

Order intake declined by 10% and invoicing by 22% in price and volume for comparable units. The effects of changed metal prices had a negative impact on order intake and invoicing of about 3 and 4 percentage points, respectively. The price trend was favorable for high value-added products, but somewhat more pressured for low value-added products.

The market situation improved slightly compared with the preceding quarter. Activity was strong, particularly in the energy sector. A slight improvement was noted for products to the aerospace and automotive industries, as well as for certain consumer-related products. The market for high value-added niche products noted a more favorable trend than other products. The strong demand reported in the energy sector related mainly to tube products, but also certain wire products. Increased activity in the mining sector entailed a rise in demand for rock drill steel. Dur-

ing the quarter, further orders were received for tube products used in nuclear power applications for a total value of approximately SEK 1,000 M, with delivery scheduled to commence in 2013.

The ongoing action program to adapt capacity and strengthen the organization and customer offering continued during the quarter and resulted in structural measures, production restrictions, and

the continued reductions of costs and working capital. Cost savings made during the quarter amounted to about SEK 400 M, and the number of employees was reduced by about 150.

Structural programs impacted earnings for the quarter by slightly more than SEK 50 M. Investments made to expand capacity for the production of steam generator tubes for the nuclear power industry proceeded according to plan.

Inventory levels declined in volume by about SEK 300 M. Changed metal prices had a positive effect of SEK 75 M on inventory valuation and earnings.

The fourth-quarter operating result was negatively impacted by about SEK 500 M as a result of low sales and production volumes, and by about SEK 30 M due to changed exchange rates. The operating result totaled SEK 136 M (65) or 3.4% (1.3) of invoicing. Return on capital employed declined to -6.7% (6.3).

## Significant events

- During the quarter Sandvik Materials Technology received additional orders for products for nuclear power applications for a total value of nearly SEK 1 billion. Deliveries are scheduled to commence in 2013.
- During the quarter Sandvik Mining and Construction received two orders for materials-handling systems for a combined value of about SEK 1.1 billion. One order in the Netherlands pertained to a complete materials-handling system for a power plant. The second order was for Brazil and related to a complete crushing and materials-handling system that includes the new Sandvik PF300 mobile crusher. The system is scheduled to be commissioned in late 2011.
- In January 2010 Sandvik Materials Technology concluded an additional multi-year agreement for steam generator tubing to the nuclear power industry. The agreement, signed with the Chinese company Harbin Electric Corporation Heavy Equipment Company Ltd is valued at SEK 1.5 billion and deliveries are scheduled for 2012 to 2014. As a consequence of this agreement and the very high demand from the nuclear power industry, the Board of Directors has approved a further expansion of production capacity for steam generator tubes. This will take place at the plants in Sweden and the Czech Republic.
- Sandvik's action program continues with the aim of adapting production capacity and cost levels to prevailing market conditions and trends. In addition to cost-saving measures in day-to-day activities, the structural activities that have been approved are summarized in the table below:

### Structural changes since third quarter 2008

	Sandvik Tooling	Sandvik Mining and Construction	Sandvik Materials Technology	Other	Group total
Reduction of temporary employees *	200	1 600	400	50	2 250

Number of employees affected by reduced working hours, temporary lay-offs and similar measures *					15 000

\* Rounded numbers

## Acquisitions and divestments

The total purchase consideration for operations acquired during quarters 1-4 amounted to SEK 3,276 M. Of the purchase consideration, a preliminary amount of SEK 2,194 M comprises goodwill and other intangible assets. The number

of employees in acquired operations amounted to 286. The accumulated effect of acquired operations was SEK 388 M on invoicing and SEK -56 M on the result after tax.

### Acquisitions during the latest 18 months

Sandvik Tooling	BTA Heller Drilling Systems, UK	16 Jan 09	33	12
Sandvik Tooling	Wolfram, Austria	28 May 09	1 800	274

### Divestments during the latest 18 months

Business area	Company/unit	Closing date	Annual revenue SEK M	No. of employees
Sandvik Materials Technology	Sandvik Calamo	30 Oct 08	65	36

## Parent Company

The Parent Company's invoicing during the fourth quarter of 2009 amounted to SEK 3,895 M (4,531) and the operating result was SEK -87 M (-548). For the period January-December 2009, invoicing was SEK 13,527 M (20,427) and the operating result was SEK -1,903 M (-395). Similar to the Group, the Parent Company's operating result was negatively impacted during the quarter by low capacity utilization in certain production units and items of a nonrecurring nature. In 2009, the

result was negatively affected by SEK 537 M due to metal price effects and SEK 197 M attributable to costs for restructuring measures. Income from shares in Group companies consists primarily of dividends from these and amounted to SEK 5,834 M (6,774) after the fourth quarter. Interest-bearing liabilities, less cash and cash equivalents and interest-bearing assets, amounted to SEK 11,319 M (12,362). Investments in fixed assets amounted to SEK 899 M (1,537).

## Full-year 2009

Full-year 2009 was characterized by a sharp deterioration in the global economy with a dramatic impact on Sandvik. Demand declined by about 30% in total and significantly more in many areas. This placed significant demands on Sandvik to rapidly adjust to a dramatically changed market climate. The rate of production was reduced by around 40% with the aim of reducing inventory levels. Comprehensive measures aimed at adapting the organization to the new circumstances were implemented during the year. These have focused on reducing costs and tied-up capital, and ensuring a favorable cash flow, while also strengthening short and long-term competitiveness.

The outcome of the activities has been positive. The Group's cost base was reduced during the year by approximately SEK 6 billion and annualized savings amounted to SEK 8 billion in the fourth quarter. The result deteriorated significantly compared with the preceding year, but achieved a gradual improvement during the second half of the year due to the implementation of action programs and a rise in demand. During the year, Sandvik increased its market share in many markets, in particular in North America and Asia.

Order intake for 2009 was influenced by the dramatic downturn in the economy and amount-

ed to SEK 71,285 M (92,610), down 23% in total and 31% at fixed exchange rates for comparable units. Invoicing was SEK 71,937 M (92,654), down 22% in total and 30% at fixed exchange rates for comparable units.

There was a marked deterioration in the operating result due to lower volumes and it amounted to SEK -1,412 M (12,794). The operating margin was -2.0% (13.8) of invoicing. Changed exchange rates had a marginal impact on earnings for the year. The price trend was positive during the year. Costs for restructuring and impairment losses amounted to SEK 2,510 M, while changed metal prices had a negative impact on the operating result of SEK 541 M. Financial net amounted to SEK -2,060 M (-2,217) and the result after financial items was SEK -3,472 M (10,577). The tax rate was 25.2%, and the result for the period amounted to SEK -2,596 M (7,836). The reported tax for the period took into account deferred tax attributable to future loss carryforwards. Earnings per share amounted to SEK -2.24 (6.30). Cash flow from operating activities was SEK 12,312 M (9,671). The Group's investments in fixed assets amounted to SEK 4,625 M (7,169). Company acquisitions accounted for SEK 2,036 M (954). After investments, acquisitions and divestments, cash flow amounted to SEK 6,119 M (2,040).

## Proposals to the AGM 2010

The Annual General Meeting will be held in Sandviken on the 4 May, at 17:00 CET. The Annual Report will be available in the first week of April on [www.sandvik.com](http://www.sandvik.com). A printed version

of the report can also be ordered on the website. The Board of Directors proposes a dividend of 1 SEK per share (3.15) for 2009.

- 1) Change compared with preceeding year at fixed exchange rates for comparable units.
- 2) As a result of the majority holding in Seco Tools AB, Sandvik consolidates this company. For comments, refer to the Seco Tools' interim report.
- 3) Internal transactions had negligible effect on business area profits.

## Accounting principles

This interim report was prepared in accordance with IFRS, applying IAS 34, Interim Financial Reporting. The same accounting and valuation policies were applied as in the most recent annual report, with the exception of certain new standards and interpretations, which are applied from 1 January 2009.

Revised IAS 1 Presentation of financial statements entails that items recognized directly in equity that do not affect transactions with owners must now be recognized in the income statement under the heading Other comprehensive income. Sandvik has chosen to present other comprehensive income as a component in the income statement and not as a separate statement. The statement of changes in equity

presents the total comprehensive income for the period and transactions with owners. The corresponding reclassifications have been made in the comparative figures.

In addition to the amendments in IAS 1, new standards and interpretations have not entailed any significant effects on Sandvik's financial reports. IFRS 8 Operating segments has not entailed any change to Sandvik's definition of the Group's segments.

The interim report for the Parent Company was prepared in accordance with the Annual Accounts Act and Securities Market Act, which is in line with standard RFR 2.2 Reporting by a legal entity, issued by the Swedish Financial Reporting Board.

## Risks and uncertainty factors

Sandvik is a global group represented in 130 countries and is as such exposed to a number of commercial and financial risks. Accordingly, risk management is an important process for Sandvik in relation to established targets. Efficient risk management is an ongoing process conducted within the framework of business control, and is part of the ongoing operations follow-up and forward-looking assessment of operations.

Sandvik's future risk exposure is assumed not

to deviate from the inherent exposure associated with Sandvik's ongoing business operations. The dramatic decline in the global economy experienced in recent quarters has caused a higher level of general uncertainty, which, in the short term, could also entail increased risk and uncertainty for Sandvik's sales and profitability. For a more in-depth analysis of risks, refer to Sandvik's Annual Report for 2008.

## Transactions with related parties

No transactions between Sandvik and related parties that have significantly affected the com-

pany's position and earnings took place during the fourth quarter or during full-year 2009.

Sandviken, 3 February 2010  
Sandvik Aktiebolag (publ)

The Board

Sandvik discloses the information provided herein pursuant to the Securities Market Act. The information is submitted for publication on 3 February 2010 at 08.00 CET. The company's auditors have not conducted a special review of the Q4 2009 report.

The Sandvik Group's interim report for the first quarter 2010 will be published on 4 May 2010.
