History driven by customer value

1862

History driven by customer value

1862

2025

Our purpose

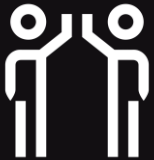

Advancing the world
through engineering

Our core values

Winning
together

Curiosity

Responsibility

Customer
focus

Leaders in digitalization

Our ambitious sustainability targets

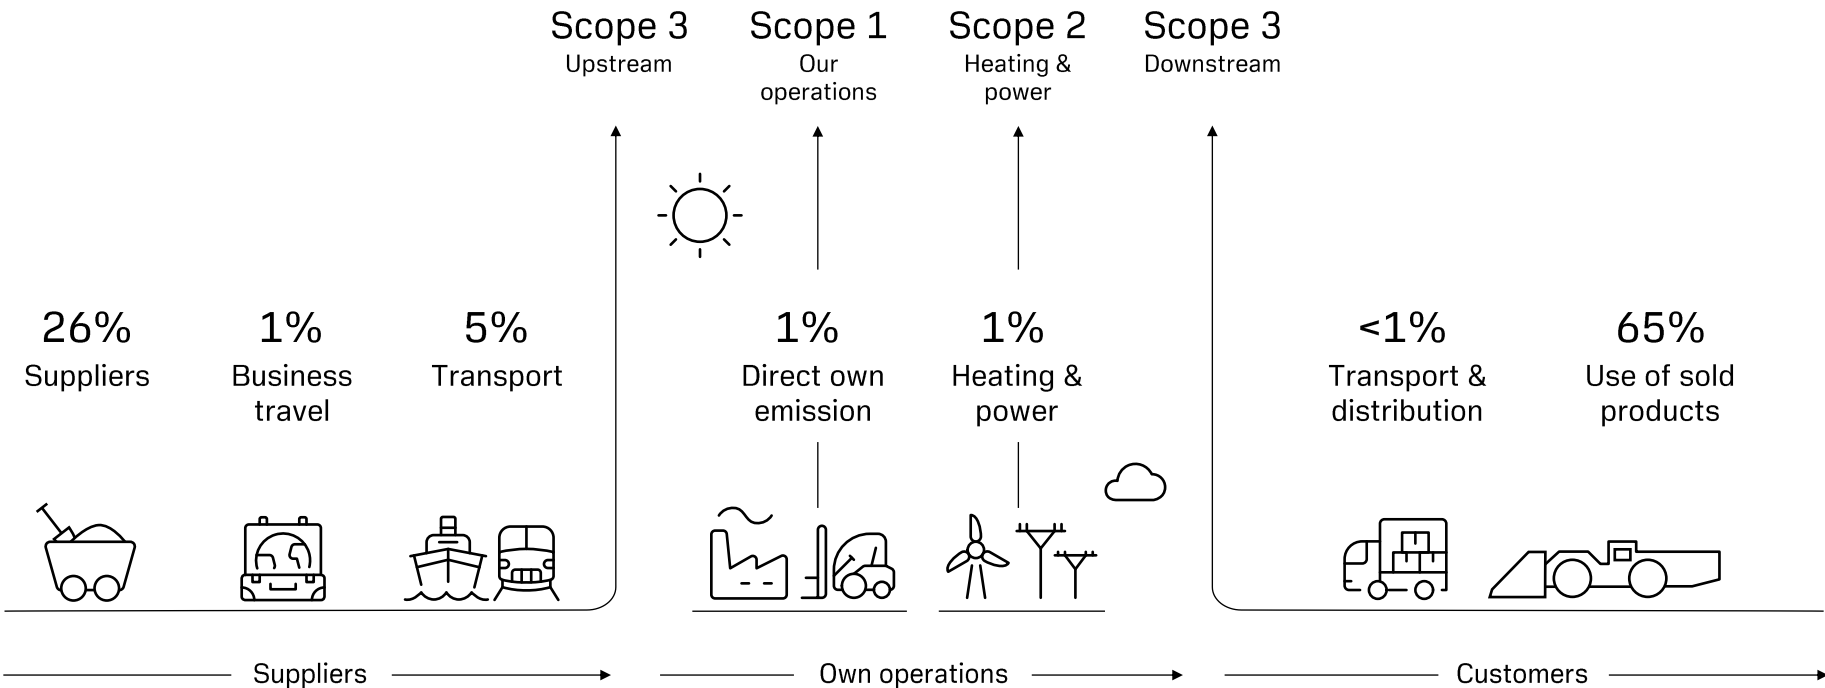

Approved science-based targets

Net zero emissions by 2050

90% waste circularity by 2030

The largest climate impact is when customers use our products

Our solutions improve
productivity and reduce the
environmental impact:

Electric, automated
mining equipment

Efficient and
sustainable
manufacturing

Eco-efficient rock
processing

Your waste problem – our recycling solution

Making tools from recycled solid carbide:

Requires

70%

less energy

means

40%

less CO₂ is emitted

Vision: Zero workplace accidents

Exceptional people

Sandvik is recognized as the desired workplace, for a diverse group of talented individuals who are highly committed to advancing the world through engineering.

Great authentic leadership with active listening

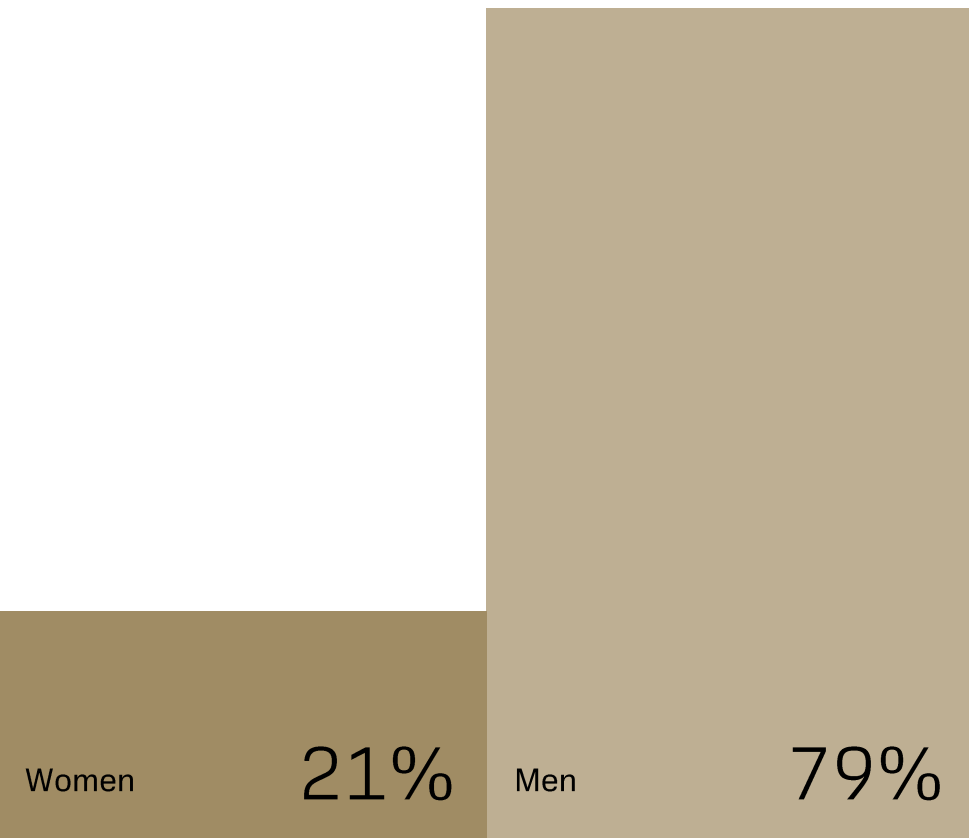

Unlocking potential for personal growth and learnability

Extensive global career opportunities & open job market

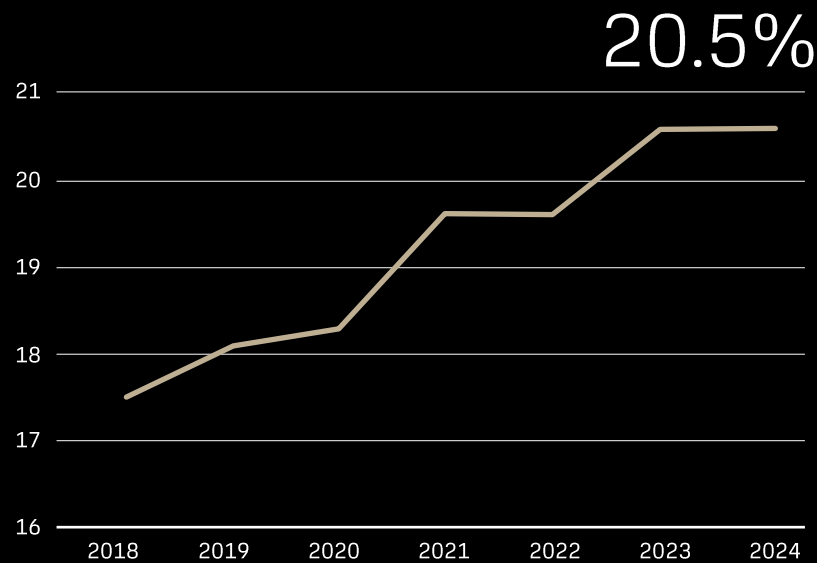

Fostering an inclusive culture with equity integrated into the employee journey

Safe, sustainable & fair work environment

Total workforce 2024

Share of women in managerial positions

Living our codes of conduct

Sandvik stands for a strong
commitment to ethical and
responsible business practices.

Fair

Respectful

Trust

Community involvement

Sustainability

Projects related to climate change, resources and waste or clean and sustainable development of communities.

Digital

Projects building technical and digital skills, supporting innovations and new ideas or introducing people to new technologies.

Societal impact

Projects supporting equality and inclusion, improving health and wellbeing or supporting infrastructure development.

We support work-
life balance
